PROFESSIONAL SUMMARY

Information Security Analyst with 4.8 years of hands-on experience in threat detection and incident response within a 24x7 SOC environment. Investigates security incidents to determine root cause and scope, builds and tunes custom detection rules, and incorporates threat intelligence into daily operations. Hands-on with EDR (CrowdStrike Falcon, Microsoft Defender), SIEM (Splunk, Microsoft Sentinel, IBM QRadar), and the MITRE ATT&CK framework, with documentation maintained in ITSM and playbooks.

PROFESSIONAL EXPERIENCE

Information Security Analyst

ExperienceFlow Software Technologies | Aug 2022 – Present | Hyderabad

- Investigated security incidents end to end, determining root cause and scope across SIEM (Splunk, Microsoft Sentinel, IBM QRadar) and EDR platform.
- Analyze endpoint alerts using CrowdStrike Falcon and Microsoft Defender to detect, investigate, and respond to security incidents.
- Monitored and analyzed threat intelligence feeds to track emerging threats and incorporated findings into daily detection and response operations.
- Developed and fine-tuned custom SIEM correlation rules and detection use cases to detect threats and reduce recurring false positives.
- Conducted IOC analysis and correlated endpoint, firewall, authentication, network, and cloud telemetry to validate threats and determine impacted systems.
- Performed incident response from triage through containment and remediation, coordinating with IT and infrastructure teams to resolve threats quickly.
- Investigated phishing emails and web-based attacks, examining headers, sender authentication, URLs, and WAF and web server logs to identify malicious activity.
- Mapped attacker techniques to the MITRE ATT&CK framework to strengthen detection coverage and guide investigations.
- Tuned SIEM correlation rules and EDR detection policies to reduce false positives and improve alert fidelity, keeping analysts focus on genuine threats.
- Conducted threat hunts across endpoint and network data to uncover hidden activity and close detection gaps.
- Analyze Windows, Linux, firewall, endpoint, and cloud logs to detect threats and reconstruct attack timelines.
- Documented incidents and response actions in ServiceNow and prepared shift handover notes to keep the next shift informed of ongoing activity.
- Investigated AWS and Microsoft 365 security activity, identifying suspicious logins and unauthorized access.

System Administrator

Global Expat Tax Consulting LLP | Oct 2021 – Aug 2022 | Hyderabad

- Administered Windows and Linux (Ubuntu) systems, handling configuration, access control, and user account permissions under least-privilege principles.
- Applied security patches and remediated vulnerabilities across Windows and Ubuntu environments to reduce exposure and keep systems stable.
- Resolved network, access, and system issues across the organization, improving reliability, and reducing downtime.

TECHNICAL SKILLS

SIEM: Splunk, Microsoft Sentinel, IBM QRadar

EDR / XDR: CrowdStrike Falcon, Microsoft Defender for Endpoint

Detection & Response: Incident Investigation, Root-Cause Analysis, Custom Detection Rules, Threat Detection, Incident Response

Threat Intelligence: Threat Intel Feeds, IOC Analysis, OSINT, MITRE ATT&CK

Detection & Automation: Custom Detection Rules, SIEM & EDR Tuning, SOAR Workflows

Threat & Web Security: Malware Analysis, Phishing Investigation, Threat Hunting, WAF (Cloudflare, AWS WAF), Web Application Security, OWASP ZAP

Network Security: TCP/IP, DNS, VPN, IDS/IPS, Palo Alto Firewall

Documentation & Reporting: ITSM (ServiceNow), Playbooks, Incident Reports, Jira

CERTIFICATIONS

- CompTIA Security+

EDUCATION

Bachelor of Commerce (B.Com) – Computer Applications — [Telangana University, Nizamabad](#) | 2018
